

Winter Memory and Attention Games

Included in this pack are pairs of winter themed pictures for you to use to play picture pairs. This will help in developing your children`s listening and attention skills. To make the game easier use fewer pictures to begin with.

You can also put some pictures into a bag or a box, presenting them to the children as you put them in. Then ask them if they can remember what you have put into the bag - everytime they remember an item, take it out of the bag and give it to them.
